# Overview

CSS Lists

List Item Maker

# CSS Lists

---

In HTML, there are two main types of lists:

- **unordered lists (`<ul>`)** - the list items are marked with bullets
- **ordered lists (`<ol>`)** - the list items are marked with numbers or letters

The CSS list properties allow you to:

- Set different list item markers for ordered lists
- Set different list item markers for unordered lists
- Set an image as the list item marker
- Add background colors to lists and list items

# List Item Makers

---

In CSS, the "list item maker" refers to the marker that appears before each list item in an ordered or unordered list.

```
ul.a {  
  list-style-type: circle;  
}  
  
ul.b {  
  list-style-type: square;  
}  
  
ol.c {  
  list-style-type: upper-roman;  
}  
  
ol.d {  
  list-style-type: lower-alpha;  
}
```

- **An Image as List Item Maker**

```
ul {  
  list-style-image: url('sqpurple.gif');  
}
```

- **List-Short hand property**

```
ul {  
  list-style: square inside url("sqpurple.gif");  
}
```
